

Tennessee Crop Weather

Tennessee Field Office • PO Box 41505 • Nashville, TN 37204 • (615) 781-5300 or (615) 891-0903 • www.nass.usda.gov

Issued Monday 3:00 PM; July 16, 2018

For the Week Ending July 15, 2018

SOME CROPS STARTING TO SHOW STRESS; HAY HARVESTED

Even though there were some scattered thundershowers across the State, mostly hot, dry weather across most of the State last week caused some crops to start showing signs of stress. Some showers are needed to help replenish soil moisture. The drier weather did, however, allow for active hay harvest. There were 5.6 days suitable for field work. Topsoil was 2 percent very short, 12 percent short, and 77 percent adequate, and 9 percent surplus. Subsoil moisture was 2 percent very short, 13 percent short, 79 percent adequate, and 6 percent surplus.

CROP PROGRESS					CONDITION

County Agent Comments

Overall crops are looking good in Lauderdale County. Crops have been stressed due to hot temperatures and lack of rain, but so far, rains have been timely.

J.C. Dupree, Lauderdale County

The farmers in Fayette County had a good week for spraying pests. We were dry all week and could use a shower. Other activities that took place were hay cutting. Crops look good and insects/disease are fairly light.

Jeff Via, Fayette County

High temperatures and developing crops are pulling large amounts of moisture from the soil and scattered showers have not been able to make up the difference. Corn and soybeans are beginning to show signs of moisture stress on eroded hillsides. Forage harvest is in full swing.

Jeff Lannom, Weakley County

There have been spotty showers this week but crops show evidence of needing rain. Hay harvest continues.

A. Ruth Correll, Wilson County

Rain has continued across the county. Crops and pastures looking very good for mid-July.

Kevin Rose, Giles County

Even though there were spotted thunder showers, some farmers got hay up and some spraying done. Crops that did not drown out look good. The second cutting of hay looks great.

Larry Moorehead, Moore County

Been dry and hot this week. Rain is needed, especially for corn crop.

John Goddard, Loudon County

Some rain this week has improved soil moisture slightly.

Chris Ramsey, Sullivan County

Crops are all looking really good. We are however, starting to get a little dry in some areas.

Ronnie Barron, Cheatham County

It is dry in Hawkins County!

James Blake Ramsey
